PROFESSIONAL SUMMARY

Python Developer with a strong foundation in Python programming, backend development, REST APIs, and database management. Hands-on experience building projects using FastAPI, Flask, PostgreSQL, Supabase, and Git, with additional exposure to AI/ML, NLP, and computer vision technologies. Skilled in problem-solving, debugging, and developing practical applications.

TECHNICAL SKILLS

Languages: Python, SQL, Java (Fundamentals)

Backend & APIs: FastAPI, Flask, REST API Design, JSON, Authentication, Role-Based Access Control

Databases: PostgreSQL (Supabase), SQL, Row-Level Security, pgvector

AI / ML: LLM Tool-Calling Agents, LangChain, LangGraph, RAG, Embeddings, Prompt Engineering, NLP, BERT, OpenCV, MediaPipe

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving

Tools: Git, GitHub, Streamlit

PROJECTS

AI Business Hub | Multi-Tenant AI Automation Platform

Python, FastAPI, LangChain, LangGraph, Supabase PostgreSQL, pgvector, React, Tailwind CSS, Git

- Developed a FastAPI and Supabase PostgreSQL platform where business owners give requests in natural language and reusable AI agents handle customers, bookings, payments, communication, inventory, reports and documents.
- Built a supervisor agent with LangChain and LangGraph that identifies the required capability, selects specialist agents and coordinates multi-step workflows as a structured graph.
- Designed controlled backend tools with permission checks and input validation, so agents never query the database directly and every action is validated before execution.
- Added a RAG pipeline (chunking, embeddings, pgvector similarity search) so agents answer from each business's own documents, such as policies and FAQs.

AI-Based Online Proctoring System

Python, OpenCV, MediaPipe, Flask, REST APIs, Git

- Developed a Python system using computer vision to monitor candidates in real time during online exams.
- Implemented detection logic for face presence, multiple faces, inactivity and suspicious activity.
- Built backend REST APIs with Flask and maintained code on GitHub, contributing to testing, debugging and documentation.

EDUCATION

B.Tech, Computer Science Engineering (AI & ML) — **2023 – 2027**
Chaitanya Deemed to be University — **CGPA: 9.8/10**
Intermediate (Class XII) | Sri Chaitanya Junior College, Hyderabad — 966/1000
Secondary School (Class X) | Sri Hayagreeva High School, Hyderabad — GPA: 10.0

CERTIFICATIONS & ACHIEVEMENTS

- IBM SkillsBuild: Python Fundamentals Certification
- 1st Place, TECH-ATHON University Hackathon (AI Cyberbullying detection with a Flask REST API)
